

FIAMME DI ROCCIA-additive

FIAMME DI ROCCIA is a special mineral additive supplied in grains. When mixed with our lime-based products such as VESUVIO or CALCITE and used for internal and external surface decoration, the result is a beautiful natural-stone effect.

USE

Reduce the viscosity of the plaster by stirring with a paddle mixer. Gradually pour the additive FIAMME DI ROCCIA, while mixing, until it has blended completely.

FIAMME DI ROCCIA may be added to a pre-colored base, but it is not advisable to add the colorant and FIAMME DI ROCCIA simultaneously. The quantity of FdR in lime-based products depends on personal taste, but here is a general guideline:

Lime-based product	FIAMME DI ROCCIA additive
24 kg	240 g
20 kg	200 g
8 kg	80 g

ENVIRONMENTAL CONDITIONS OF APPLICATION

Ambient temperature should be between +10°C and +30°C, while the relative humidity should not exceed 85%.

STORAGE

The product is not sensitive to temperature variations. However, it is advisable to keep it in a dry place and protect from extreme temperatures.

When the lime-based product, is mixed with FIAMME DI ROCCIA, we recommend usage within a few days.

SAFETY GUIDELINES

Avoid contact with skin and eyes. If contact occurs, rinse thoroughly with water.

Keep out of the reach of children.

For further information consult the Safety Data Sheet.

DISPOSAL

The product must be disposed in accordance with current regulations. Empty containers should be sent to recycling plants.

TECHNICAL DATA

Packaging	240 g
Specific weight	2,5 g/cm ³
Aspect	Grains
Color	Light brown/gold
