

OMBRA is a water-based topcoat, used as a protective coating for lime-based plasters, as well as a decorative finish for indoor applications.

OMBRA can be colored with the QUATTROCOLORI coloring system, as suggested in the CALCE VENEZIANA catalogue, or with COLORIBASE (light-resistant) for external use (in this case test sample is necessary). When processed with the Coverit application techniques, such as ARSENALE, EFFETTO TRAVERTINO, TAGLI or LAVA, the effect can be very effective.
